

Ordinary Differential Equations - Part 1

$$f' = f \quad \leftarrow \text{search for a function } f \text{ that satisfies this?}$$

$$f(x) = e^x$$

Other examples: (a) $\ddot{x} = -\omega^2 x$ (harmonic oscillator) (second order derivatives)

(b)  $m \cdot \ddot{x} = F$
 $m \cdot \ddot{y} = F$
 $m \cdot \ddot{z} = F$ } system of differential equations

- Topics:
- system of ordinary differential equations (ODE)
 - solution methods
 - existence and uniqueness of solutions
 - linear ordinary differential equations (matrix exponential function)
